Topline Industrial Tile Cutting Machine

Welcome to the Bright Ideas Data Sheet for the Topline Industrial Tile Cutting Machine, which focuses on the main advantages of using the four different sized machines in the areas they are used the most. This data sheet will follow strategic advantages giving you helpful tips and points on achieving the perfect cut.

● Helpful Information on using the Topline Industrial Tile Cutting Machine...

The Topline Industrial Tile Cutting Machine is an excellent cutting machine for ceramic and porcelain tiles. The size of its enormous bed also allows it to cut through large slabs by applying large force and pressure for cleaner cuts. Below are numerous points on how to benefit most from this tile cutting machine:

- Achieve a professional cut / breaking of tiles or slabs up to 16mm in thickness.
- Features a 22mm tungsten carbide wheel.
- The solid guide bar makes exact cuts on both short and long cutting lengths.
- Has a precise and durable ball bearing cutting head which is maintenance free.
- Wide, anti-skid and spring supported overlay lockable breaking device for increased handling and an optimal view of the tile to protect it from scratches.
- Breaking device with high compressive force.
- PVC safety pads for breaker foot protects against scratches on tiles.
- Lockable cutting head for safe transportation.

● Available Machine Sizes & Accessories...

The Topline Industrial Tile Cutting Machine is available in the following sizes. The item code is also provided:

- **CODE: TCG1062** - Topline Tile Cutter with Folding Stand - 630mm
- **CODE: TCG1063** - Topline Tile Cutter (No Folding Stand) - 720mm
- **CODE: TCG1064** - Topline Tile Cutter (No Folding Stand) - 920mm
- **CODE: TCG1065** - Topline Tile Cutter (No Folding Stand) - 1200mm

Please note that only TCG1062 (630mm Machine) is available with a free folding stand. The folding stand is also sold separately and can be used as an aid support for most other manual tile cutting machines.
